OF THE FOREST")

Key Facts About the Founder and Initiative:

Visionary Leadership:

Anant Ambani

- launched the initiative to focus on the rescue and long-term care of abused, injured, and endangered animals from both India and abroad.
- **Philanthropic Support:** The project is established and run by the Reliance Foundation, the philanthropic arm of Reliance Industries.
- **Global Recognition:** In late 2025,
- Anant Ambani
- was honoured with the Global Humanitarian Award for his leadership in wildlife conservation, becoming the youngest and first Asian recipient of this award.
- **Scale of Operations:** Vantara is home to over 2,000 animals across more than 40 species, including a world-class elephant hospital and specialised care centres for lions, tigers, and crocodiles.

Specialized Medical Facilities

The medical infrastructure at Vantara is equipped with advanced technology comparable to top human hospitals, ensuring precise diagnostics and treatment for diverse species.

- Diagnostic & Surgical Units: The main hospital includes high-end imaging equipment such as MRI, CT scan, X-ray, and ultrasound. It also features specialized units for endoscopy, lithotripsy, dialysis, and robotic laser surgeries.

Specialized Medical Facilities
The medical infrastructure at Vantara is equipped with advanced technology comparable to top human hospitals, ensuring precise diagnostics and treatment for diverse species.

Hospitality & Care Philosophy

Rather than a traditional hospitality model for humans, Vantara focuses on "**Jeev Seva**" (service to living beings), prioritizing the dignity and comfort of the animals.

Archidust +1

- **Nutrition & Diet:** A **14,000 sq ft kitchen** staffed by expert chefs provides scientifically curated, species-specific diets. For elephants, this includes round-the-clock support and traditional treatments like **multani-mitti massages**.
- **Caregiver Support:** A team of over **3,500 professionals**, including expert veterinarians, biologists, and compassionate caregivers, provides 24/7 monitoring and personalized care.
- **Habitat Integration:** Animals reside in naturalistic, scientifically designed enclosures that mimic their native environments, featuring hydrotherapy pools and water bodies to ensure long-term well-being.
- **Public Access:** As of early 2026, Vantara remains primarily a rescue and rehabilitation center with **no general public access** to ensure the animals' privacy and recovery. However, limited educational tours and a zoological park are planned for the future.

The Key Highlights

Massive Infrastructure: A dedicated 14,000+ sq. ft. kitchen is designed exclusively for elephants, making it one of the largest specialized animal kitchens in the world.

Scientific Expertise: The diet is curated by German nutrition expert Professor Petra Wolf and a team of five Indian nutritionists to meet specific medical and physical needs.

The "Royal" Elephant Diet: Each elephant consumes roughly 130 kg of food daily. Meals include fresh fruits (apples, pomegranates), vegetables, khichdi, and ragi laddus.

Medicinal "Elephant Laddus": Hand-made daily using jaggery, black salt, and ghee, these treats are used to deliver medication to elephants who previously rejected bitter traditional medicines.

The Golden Tiger (also known as the Golden Tabby or Strawberry Tiger) is one of the rarest and most visually striking animals at Vantara. It isn't a separate species, but a beautiful "genetic miracle."

African Savanna Wonders

Discover the diversity of wildlife in our savanna exhibit

The African Savanna Exhibit showcases a variety of animals, including lions, elephants, and zebras, providing visitors with an immersive wildlife experience.

Asian Rainforest Wonders

Explore the diverse wildlife of Southeast Asia's lush rainforest ecosystems

The Asian Rainforest Habitat showcases the rich biodiversity, featuring unique species like elephants and various exotic plants, fostering conservation and education for all visitors.

South American Aviary

Discover the rich diversity of tropical bird species here.

Experience the **exotic beauty** of our South American Aviary, home to a variety of vibrant birds that enchant visitors with their colors and calls.

Discover the key statistics of Vantara Zoo

3,500 Acres

Total area of the zoo

Vantara Zoo spans an impressive 3,500 acres, providing ample space for diverse habitats and enriching experiences for over 1 million visitors annually, showcasing wildlife from around the globe.

Conservation Efforts at Vantara Zoo

Breeding Programs

Focused on ensuring species survival through controlled breeding efforts.

Habitat Preservation

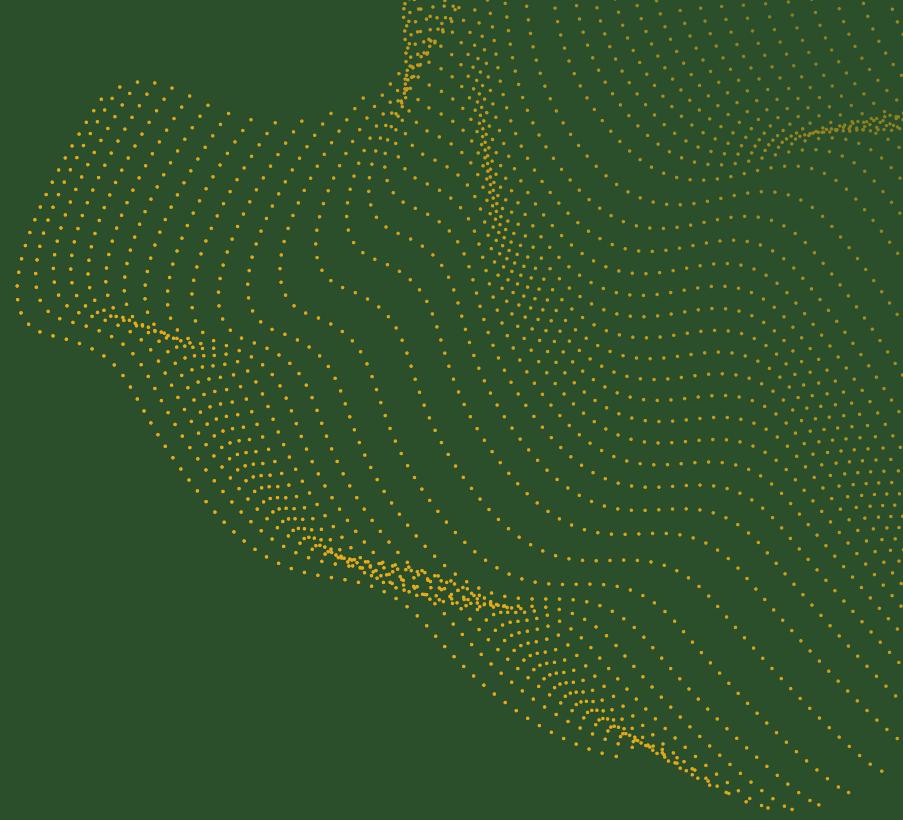

Protecting natural environments to support wildlife sustainability and coexistence.

Advanced Medical Diagnostics

Human-Scale Imaging: The facility houses a 100,000 sq. ft. hospital featuring MRI and CT scan machines specifically calibrated for large wildlife.

AI Health Tracking: The sanctuary uses AI-based monitoring to track animal behavior and vitals. This can predict if an animal is getting sick even before they show physical symptoms.

Robotic Surgery: The hospital is equipped for minimally invasive robotic and endoscopic surgeries, which result in faster recovery times and smaller scars for the animals.

Thank You!

- "The greatness of a nation and its moral progress can be judged by the way its animals are treated."

— Mahatma Gandhi

Thank you for joining me in exploring the future of wildlife conservation.
